December 2022

Fun Facts About The Holidays: Denny's 24-hour restaurants closed for Christmas for the first time in December of 1988, which seemed nice until the employees realized they'd been built without locks. Since the chain never shut its doors, many of their restaurants were either built without locks on the doors or no one could find the keys to the locks that did exist. The company had to install door locks in more than 700 of its restaurants so that they could close for that one day.
